

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green. They are positioned diagonally, with the blue one partially covering the green one.

Rating Project

CS 498

Team Members

- Eli Sokeland
- Brayden Gates
- Joshua Johannsen
- Nick Burrell

Client Information

- EduSource
 - Jason and Kendra Beutler
 - Custom software solutions, apprenticeship program, and robotic process automation

Mentor Feedback

- Mid-Iteration
 - Software: Good progress so far.
 - User doc: No changes yet.
 - Development doc: No changes yet.
 - Deployment doc: No changes yet.
- Before Client Meeting
 - Software: Looks good, some pages could be styled more.
 - User Doc: Updates look good!
 - Development Doc: Looks good!
 - Deployment: Looks good!

Software Experience: Mentor

- Downloaded both the frontend and backend from GitHub to use it.
- Documentation instructing how to use and start the project is great!
- Running the software is good.

Client Feedback

- Software requirements
 - Like the new additions! Can't wait to see the in progress portions completed for next iteration!
- User documentation
 - Looks good, no comment.
- Deployment documentation
 - Looks good, no comment.
- Development documentation
 - Looks good, no comment.
- Iteration 5 expectations
 - Agreed upon items pretty easily.

Software Experience: Client

- Liked the design of what we have so far.
- Runs as expected of what the software should do.
- Asked if we could change the color of the tab selected on the Account page for choosing between the Ratings Given and the Categories tab to better differentiate between the two.

Iteration 5 Features

- An Admin should be able to view the individual category ratings on an apprentice's page.
- Adding the Full-Time Employee (FTE) role into the system with different permissions than an Apprentice and Admin.
- Replace the temporary profile icon with a graph showing a user's overall rating over time.
- Change the cookie settings so that the user isn't logged out as quickly.

What Everyone Worked On

- Eli Sokeland: Redesigned the rating cards on the account page and created the rating graph component on the individual category page.
- Joshua Johannsen: Took the View Apprentice page, created a navlink with Apprentice's name. Used Apprentice ID to reconstruct their homepage and show it to the admin viewing their information so they could view more in depth information.
- Brayden Gates: Created old and new password boxes on the Edit Profile page and made the user able to change their password.
- Nick Burrell: Created the View Apprentice page, apprentice cards, replaced number selector on Rate an Apprentice page with the rating component, and updated the User Documentation to match the new layout of some of the pages.

Something Interesting/Funny
