Rating Project

CS 498

Team Members

- Eli Sokeland
- Brayden Gates
- Joshua Johannsen
- Nick Burrell

Client Information

- EduSource
  - Jason and Kendra Beutler
  - Custom software solutions, apprenticeship program, and robotic process automation

Mentor Feedback

- Mid-Iteration
  - Software: Looks good so far! On track to close all issues opened since the beginning of the project.
  - User doc: No changes yet.
  - Development doc: No changes yet.
  - Deployment doc: No changes yet.
- Before Client Meeting
  - Software: Looks awesome! Like the new manage content admin panel and the graph instead of the profile image.
  - User Doc: Looks good!
  - Development Doc: Looks good!
  - Deployment: Looks good!

Software Experience: Mentor

- Used it by taking control during Zoom meeting.
- Didn't have any problems using the software.
- Software was easy to navigate!

Client Feedback

- Meeting with client will be next week. Client is out of town this week and couldn't meet beforehand.

What Everyone Worked On

- Eli Sokeland: Completed user overall ratings graph, added a min/max to the y-axis of the ratings graphs, added FTE and apprentice user types, converted add category and add user to manage content, added archiving functionality (backend and frontend rendering), fixed authentication bugs, adjusted app title and favicon, and refined requests and backend api security.
- Joshua Johannsen: Release of iterations and submission of Software, Helping with changing of Add Category button to Manage Content button for Admins.
- Brayden Gates: Helped with the adaptation of the overall graphs for each user.
- Nick Burrell: Updated user and developer documentation, assisted in creating the user's overall rating graph, and assisted in User and Category status functionality.

Something Interesting/Funny
